1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Peter Jansson (Applicant's Representative) on 03 August 2006.

IN THE CLAIMS

Claim 1 has been amended to read as follows:

--A plug baffle device for installation in a coolant passage of a mold, the plug baffle device comprising a coolant-encountering fin and a separate base member is tolerance-fit tight mechanical mating engagement therewith, the mating engagement being accomplished by male and female interconnecting members and the base member having a mold-connecting portion adapted for sealing closure with the mold.--

Claims 2 and 3 have been cancelled.

Art Unit: 1722

In claim 7, line 1, "claim 5" has been deleted and replaced with "claim 1".

In claim 15, line 4, "mating" has been inserted between "mechanical" and "engagement".

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest a plug baffle device as recited in the claims of the instant application. The closest prior art is demonstrated by Japanese Pub. No. 11-42644 (previously of record; hereinafter "JP '644"); Japanese Pub. No. 08-258046 (previously of record; hereinafter "JP '046"); Japanese Pub. No. 06-192770 (previously of record; hereinafter "JP '770"); and Lin (U.S. Pat. No. 5,945,140).

While the Japanese references disclose various arrangements with a fin and separate base member, none of the references teach or suggest a fin in tolerance-fit tight mechanical engagement with a separate base member as recited in the claims of the instant application. Instead, the references of JP '770, JP '644, and JP '046 appear instead to disclose the use of loose connections between the base and fin members, thereby teaching away from the instant invention.

Art Unit: 1722

Lin does not disclose a female interconnecting member or fin receive portion for mating connection with the fin portion of the device.

See also reasons for indicating allowable subject matter in the previous Office Actions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald Heckenberg whose telephone number is (571) 272-1131. The examiner can normally be reached on Monday through Friday from 9:30 A.M. to 6:00 P.M.
